PM10 & PM2.5 Community Sensors
Questions and Answers
Last Updated 12/14/23 – 1:25 p.m.**

- 1. Question:** Is the period of monitoring intended to be Feb 2024 – Feb2026? The RFP has a start date of Feb 2023.

Response: The collection of measurements will occur from February 01, 2024 through February 01, 2026.

- 2. Question:** On page 2 of the RFP under ‘Scope of Work Contents’, the number 1 task is ‘Identification of sensors to be used’. Elsewhere in the document, Task 1 is described as ‘Develop and submit monitoring and data management plan’ Which Task 1 should be addressed in the Work Plan?

Response: Task 1 is the ‘Identification of sensors to be used’, there is no need to ‘Develop and submit a monitoring and data management plan’.

- 3. Question:** Are the sensors going to be running on power from the sites or will they need solar/battery to run them?

Response: The sites have not been identified, therefore it is not known at this time if line power will be available.
