

RULE 116 EMISSIONS STATEMENT AND CERTIFICATION
(Adopted 02/23/2010, Revised 11/03/2020)

- A. Purpose
This Rule establishes the requirements for the submittal of emissions statements from specified stationary sources in accordance with the requirements of the Clean Air Act [Section 182(a)(3)(B)].
- B. Applicability
The requirements of this Rule are applicable to any stationary source, which emits or may emit oxides of nitrogen (NO_x) or reactive organic compounds (ROCs).
- C. Requirements
- C.1 The owner or operator of any stationary source that is subject to this Rule shall provide the APCO with a written emissions statement showing actual emissions or operational data allowing the APCO to estimate actual emissions of oxides of nitrogen and reactive organic compounds from that source.
- C.2 The emissions statement shall be on a form or in a format specified by the APCO and shall contain emissions data for the time period specified by the APCO. Emissions statements shall be submitted annually.
- D. Administrative Requirements
- D.1 The APCO may waive the requirements to any class or category of stationary sources which emit less than 25 tons per year of NO_x or ROCs if the District provides the California Air Resources Board with an emission inventory of sources emitting greater than 10 tons per year of NO_x or ROCs. Emissions calculations shall be based on emission factors approved by the APCO and established by the Environmental Protection Agency (EPA) or other methods acceptable by the EPA.
- D.2 All official documents submitted to the District shall contain a certification signed and dated by a responsible official of the company attesting that the information contained in the submitted documents is accurate to the best knowledge of the individual certifying the submission. The requirements of this Section apply to, but are not limited to, the emissions statements required in Section C of this Rule.
