SCHEDULE 9 - MISCELLANEOUS SCHEDULE

Any article, machine, equipment or other contrivance which may cause the issuance of air contaminants as defined in Rule 101 of these Rules and Regulations, which is not included in the preceding schedules, shall be assessed a permit fee of $241.00 for the year 2027. Beginning January 1, 2006, this permit fee will be adjusted annually by multiplying the base permit fee for the previous year by the average percentage rate for the month of August of the previous year (rounded to the nearest half dollar) which is derived by a fraction, the numerator of which is the Revised Consumer Price Index for All Urban Consumers as published by the United States Department of Labor, Bureau of Labor Statistics for All Consumers for the Rural Service Area #7 statistical area (All Items, Base 1982-84 = 100), (the “CPI”), and the denominator of which is the CPI for the same calendar month of the prior year. Notwithstanding the foregoing, in no event shall the permit fee be decreased and in no event shall any increase exceed 4% per annum, without formal action by the Air Pollution Control District Board.

If the Air Pollution Control Officer determines that the actual costs to the District for inspection, monitoring, evaluation, and administration incurred by a project are substantially different than those paid by the project, the Air Pollution Control Officer may, after documentation of such costs, establish a revised fee for the project. Such determination may be appealed to the Hearing Board in accordance with the Hearing Board Procedures of the Imperial County Air Pollution Control District.
